Watermelon	70 - 100 days	Corn, Squash, Sunflowers	Potatoes
Zucchini	40 - 50 days	Beans, Nasturtiums, Radishes	Potatoes

IMPORTANT: *If a fruit or vegetable is missing seed or seedling lines, this means those options are not recommended for that plant. Eg. Seed planting is not recommended for Blueberries due to the excessive time it takes to grow blueberries from seed. It does not mean it is not possible, it just means it is not recommended.*
